

SEAMLESS

THIN PORCELAIN PANELS BY SPECIALTY TILE

V125

SEAMLESS SLAB SPECIFICATION

Contemporary designs soar when there are no barriers. Technological obstacles of the past have been eliminated, giving designers the freedom to create seamlessly with thin porcelain panels, so that your design is uninterrupted. Because scale matters.

Thin porcelain panels can be used in a variety of applications, including exterior cladding, walls, floors, over existing tile, on countertops and furniture. With so many options, we can provide technical assistance with a specification that is customized for your project.

Tips for specifying slabs:

- **Plan for your seams:** Whenever possible, it is ideal to build to suit the size of the slabs. With a variety of slab sizes ranging up to 126", it's easy to find a size that is a good match for the dimensions of your project. They can be installed horizontally or vertically, so consider your options to minimize waste. Although priced by the square foot, slabs are sold as full slabs, so it's best to consider a design that will get the most use of each slab. If you are carrying over graphics from one slab to another, ensure your cuts won't interrupt the graphics.
- **Plan for the size of the slab in relation to the room:** Even though your wall is the right size, is your room? If you cannot carry in a slab through a doorway and manage to turn it around in the room, or if the elevator to a job site doesn't fit a slab, a redesign with a smaller slab size might be the best option.
- **Plan for your fabrication:** Fabrication costs can range significantly from project to project. Corners, outlets, and custom build-outs are typically add-ons, so ensure that they are planned for. Consider using Schluter edge profiles wherever feasible to save on fabrication costs.
- **Specify the right setting materials:** We can assist you in writing a spec for the correct allied products for your project.

Testing data is relevant to the application and varies by color. We can provide data upon request.

INSTALLATION

MULTIMAX LITE

The ultimate, lightweight one-step, polymer fortified, Large and Heavy Tile mortar for interior and exterior installation of ceramic tile, porcelain tile, glass tile, stone, quarry tile, pavers and brick. MULTIMAX LITE features maximum non-sag performance on walls and maximum buildup of up to $\frac{3}{4}$ " (19 mm) without shrinkage on floors.

254 PLATINUM

The ultimate one-step, polymer fortified, thin-set mortar for interior and exterior installation of ceramic tile, porcelain tile, Gauged Porcelain Tile Panels/Slabs (GTP), stone, quarry tile, pavers and brick.

254 PLATINUM PLUS

254 PLATINUM™ Plus is a high-performance, lightweight polymer-fortified thin-set adhesive mortar designed for both indoor and outdoor applications, making it versatile for any project. If you're working with Gauged Porcelain Tile (GPT) or Gauged Porcelain Tile Panels/Slabs (GTP), 254 PLATINUM Plus is the optimal solution.

INSTALLATION

ULTRABOND ECO GPT

Ultrabond ECO GPT is a single-component, non-sag, easy-to-trowel, hybridpolymer-based adhesive technology specially designed for the installation of gauged porcelain tile and gauged porcelain tile panels/slabs on interior vertical surfaces and countertops. Unique technology advancements are incorporated in the formulation of Ultrabond ECO GPT for delivering instant grab, while allowing for the needed adjustability of panels and large-format tile.

MAPEI ULTRALITE S2

MAPEI Ultralite S2 is a premium-grade, lightweight, single-component thin-set mortar that is ideal for installation of gauged (formerly "thin") porcelain tile.

This high-performance, highly deformable, polymer-modified mortar is formulated with Easy Glide Technology™ for ease of application. MAPEI Ultralite S2 features a long open time and superior transfer properties to enhance back-buttering, and can be used also for ceramic tile and stone. MAPEI Ultralite S2 's unique Ultralite Technology™ provides twice the coverage of a standard thin-set mortar per pound/kg and may contribute to LEED points with 20% recycled content.
